

# Survival Stories

Four penguin campers are telling tales of scary creatures they've seen. They each barely escaped without being eaten! Find the creatures' names and then compare the campers' narratives (to the letter) to figure out where the scariest beasts can be found.

The great beast awoke, wailing angrily, whiskers twitching and teeth bared, covered in strange eldritch markings. I almost died!

A demon with huge wings abhorrently descended from the sky and stepped on the roiling surface of the ocean like a spirit! I cried.

I saw a huge shadow beneath the waves, in the shape of a titanic fish, eviscerating its unfortunate prey! I'm lucky I escaped intact!

From a dark shadow, a strange creature darted in and stole my fish! Keep watch or they may very well take the young'uns from the nest!
